Forecast For The United Kingdom
Issued by Met Office Exeter
at 0400 on Monday 15 Nov 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Sunnier in northwest, patchy rain in some central areas.

Today:
Central and southeastern areas starting with mix of cloud and fog, but sunny intervals developing in places. Rain clearing southeast corners of Northern Ireland and Scotland, leaving mainly fine weather. Weakening rainband moving into Wales, northern and western England. Mild.

Tonight:
Risk of fog in east and southeast England, the west cloudy and mild, with patchy light rain. Clearer and chilly in north, although the far northwest turning windy and damp.

Tuesday:
Wet start in western Scotland, the rain easing as it moves into central UK. To the rear, sunny intervals and blustery showers, colder. Further south, largely dry, sunshine in places.

Outlook for Wednesday to Friday:
Changeable in the north with spells of rain or showers and often windy. Largely dry in the south with variable cloud. A chilly start on Wednesday before turning milder.
